

LIVER CANCER AWARENESS

Do you know the signs?

The symptoms of liver cancer can be vague and mistaken for other, less serious conditions. If you have any of these symptoms for a prolonged period, see your GP:

Symptoms

Fever

Pale bowel motions

Loss of appetite

Excessive tiredness

Unexplained weight loss

Jaundice (yellowing of skin/eyes)

Pain on upper right side of the abdomen

Nausea

Notes for your GP appointment

- Describe your symptoms.
- How long have they been going on?
- Do you have family history of liver cancer?
- Have you had a hepatitis infection?

Ask your GP what the plan is for treating symptoms. If medication is prescribed, make a plan and time for your next appointment to reassess symptoms if still present.
