

PANCREATIC CANCER AWARENESS

Do you know the signs?

The symptoms of liver cancer can be vague and mistaken for other, less serious conditions. If you have any of these symptoms for a prolonged period, see you GP:

- | | |
|---|---|
| <input type="radio"/> <u>persistent indigestion</u> | <input type="radio"/> <u>unexplained weight loss</u> |
| <input type="radio"/> <u>loss of appetite</u> | <input type="radio"/> <u>dark urine or</u> |
| <input type="radio"/> <u>nausea</u> | <input type="radio"/> <u>changes to bowel motions</u> |
| <input type="radio"/> <u>back pain or pain on</u> | <input type="radio"/> <u>excessive tiredness</u> |
| <input type="radio"/> <u>side of abdomen</u> | <input type="radio"/> <u>jaundice</u> |
| | <input type="radio"/> <u>(yellowing of skin/eyes)</u> |

Notes for your GP appointment:

- Describe your symptoms.
- How long have they been going on?
- Do you have family history of pancreatic cancer?
- Do you have early-onset diabetes?

Ask your GP what the plan is for treating symptoms. If medication is prescribed, make a plan and time for your next appointment to reassess symptoms if still present.
